Ms. Mueller stated there are also larger flow conditions since the last update of the facility. She said they need to look at the system as a whole. Ms. Mueller proposed patching the current problems to bide time to come up with the appropriate plan for future needs in the next three to five years.

Ms. Mueller stated the lift station was manufactured by Smith and Loveless who is represented by a local dealer, William Reed and Associates. She said they provided an estimate to replace the rotating assembly at the cost of \$26,000 per pump assembly. Mr. Weigel stated \$50,000 was placed in the 2019 budget, but he said he received a proposal for this preliminary design, design, and the bidding process in the amount of \$215,000. He said he estimates the actual project would cost \$2 million. He said he was looking for the Council's authorization to allow him to reprogram funds to move forward with the design and bid process.
